ᚠ ᚠ > two suns

interesting the sowilō represents the sun

what did Hitler know about our realm that's been obfuscated?

even the Schwarze Sonne (Black Sun) Sonnenrad (Sun Wheel) depicts the black sun and the curved magnetic flux as it expands to the south

what if there are "two suns" depending the latitude?

north of -66.6° latitude the sun visible being in the north; south of -66.6° the sun visible being in the south?

these are symbols of Creation

but have been hijacked and stigmatized to portray evil (falsely) in my opinion
